Research funding

Sep '21 – Aug '24 **Scalable and Energy-efficient Networked Systems at the Edge**, Academy of Finland postdoctoral researcher, Award amount: 240,820 EUR

The project establishes energy-efficiency as a fundamental metric in designing and deploying applications in edge data centers. The goal is to minimize the energy consumed of networking infrastructure while still supporting the always-on, connected services of the future.

Feb '21 – Jan '22 **Optimization of energy in edge networks**, postdoc pooli (Finnish Cultural Foundation), Principal investigator, Award amount: 52,000 EUR

The project involved devising new optimization models to allocate resources in data centers such that energy consumed is minimized. The project ended in Aug '21 as I received other funding.
